NEWS RELEASE

May 27, 2005

TSXV Trading Symbol: **FNC**
S.E.C. Exemption: 12(g)3-2(b)

The Company wishes to announce that it has acquired by staking, with the Sheridan Platinum Group Ltd., about 225 square miles (575 km²) of prospective ground in the Johan Beetz area of Quebec's North Shore. The area was the site of major uranium rushes in the 60's and 70's and part of the present property portfolio covers most of the areas of interest at that time.

This move was prompted by the robust state of world uranium markets, and the realization that the Johan Beetz area exhibits strong geological parallels to world class deposit models such as Rossing and Olympic Dam.

Metallurgical test work continues on samples of massive hemoilmenite from the Company's Mingan Titanium Property and this process, which is being carried out at Longue Pointe de Mingan, is scheduled to continue through the summer.

ON BEHALF OF THE BOARD

"Peter H. Smith", President
